

+ NO LLM · NO API · INSTANT

Generate Your Personalized Interview

Enter your name, target company, and role — our rules engine maps your profile to the right topics, difficulty mix, and 8–12 tailored questions in seconds.

⚡ Generate Interview

[See How It Works →](#)

A fully deterministic, rule-based engine — no black-box AI, no surprises.

Role-Aware Mapping

Automatically normalizes your role title and maps it to weighted topic categories — Gen AI Engineer gets 40% Gen AI questions, Data Scientist gets 35% ML, and so on.

Smart Difficulty

Experience level directly controls the easy / medium / hard ratio. Freshers get a confidence-building mix; senior candidates face 70% hard questions.

114+ Curated Questions

Hand-picked questions spanning Gen AI, Machine Learning, Python, NLP, Deep Learning, System Design, Statistics, and Behavioral — three difficulty tiers each.

Follow-Up Hints

Every question ships with an interviewer-style follow-up to deepen your preparation. Toggle them on screen or print with all hints visible.

Zero API Calls

Fully rule-based — no LLM, no external API, no latency, no cost. The engine runs in pure Python and produces consistent, reproducible results every time.

Print-Ready Output

Clean, formatted output organized by topic with difficulty badges. Print as a PDF, study on screen, or share it with your mock interviewer.

THE PROCESS

How InterviewX-AI works in 4 steps

A transparent, deterministic pipeline from your profile to a ready-to-use interview sheet.

01 Enter Your Details

Provide your name, the target company, your role (e.g. "Gen AI Engineer"), and your experience level. That's all the engine needs.

02 Rules Engine Fires

Your role is normalized and fuzzy-matched to one of 18 known role profiles. Each profile carries a weighted list of topics and a difficulty distribution.

03 Questions Selected

Questions are drawn from a 114-item bank, topic by topic, respecting weighted counts and difficulty ratios — no duplicates, no gaps, always at least one per topic.

03 Questions Selected

Questions are drawn from a 114-item bank, topic by topic, respecting weighted counts and difficulty ratios — no duplicates, no gaps, always at least one per topic.

04 Your Interview is Ready

Browse questions by topic, reveal follow-up hints, see exactly which rules fired, and print your personalized question set instantly.
